Le Château et la Muraille  
The Castle and old wall

23-12-65.

We actually

stayed a night in this old castle. You must have been in my mind when I suggested we stay there, so I could enjoy it for you too. It has been exquisitely restored & has only 6 bedrooms & numerous public rooms. The castle dates back to 12<sup>th</sup> Century. The window between inner 2 towers is the dining room & is tiled all the way up its 18 ft. high with the most enchanting old tiles in coffee & cream colors. The small village is a gem pouring itself down a hill side & is completely surrounded by the battlemented walls. To get our small car in the gate, I had to back & fill to get round the corner. Only one drivable street the others are mostly staircases of cobbles. Best love to you all.
